6. APPENDIX I: Proposal on Halal Traceability Study on Sabah Agro-Based Products
1. INTRODUCTION

The industrial training was carried out at IDS Infotech Sdn. Bhd., a subsidiary company of the Institute for Development Studies (Sabah), which is located at Kota Kinabalu, in the State of Sabah, Malaysia. The training was for a five-month period beginning in February 2007 and ending in July 2007.

The industrial training was to fulfil the partial requirement for the Master Program in Information Technology (IT), University of La Rochelle (ULR), in partnership with Open University Malaysia (OUM).

The ULR representative in Malaysia and the person in charge of the program is Prof. Dr. Patrice Boursier.

This report contains activities undertaken/participated, meetings and seminars attended, experiences gained as well as observations made during the training.
1.1 Company Profile

The objectives for which the company is established are:

1. To acquire, develop, sell, lease, transfer, exchange and promote the usage of information technology and telecommunication technology.

2. To provide training, organize and conduct courses, seminars and exhibitions and undertake research in information technology and telecommunication technology.

3. To carry on business as consultants in information technology and telecommunication technology.

4. To invest, purchase and enter joint-venture in the development of information technology and telecommunication technology and to obtain and grant patents, license, permit, authority, rights, lease or hire for the usage of information technology and telecommunication technology.

Aside from its day-to-day business operations, IDS Infotech Sdn. Bhd also provides technical support to the Institute for Development Studies (Sabah), a policy research institute of the Sabah State Government.

1.2 Business Activities

The services provided by IDS Infotech Sdn. Bhd in this respect include the following:

- trouble shooting
