## **ABSTRACT**

This final project for the Masters Information Technology Program focuses on a system intending to assist school teachers in dealing with the school student disciplinary system. Disciplinary records which are usually made on cards are now stored into a central database using Microsoft Access and Visual Basic .

Records can be made of all students in the school concerned according to class. Relevant particulars of every student are stored. Types of disciplinary problems are listed and users only need to choose them from prepared list boxes provided.

Choice of disciplinary problems will generate demerit marks to indicate the corresponding seriousness of each problem committed. The system can generate letters to parents as well as students concerned. It will print student particulars when and as required. Up to date disciplinary reports can be generated and produced instantly at the touch of selected buttons.

The system will be user-friendly whereby teachers will only need to choose a required operation through the use of attractive buttons. The system will be using the window interface.

**ABSTRAK**  
(*versi Bahasa Malaysia*)

Projek akhir bagi Program Masters Information Technology ini berfokus kepada sistem yang bertujuan untuk membantu guru-guru mengendalikan sistem disiplin di sekolah. Rekod disiplin yang lazimnya dibuat di dalam kad kini akan disimpan dalam pangkalan data menggunakan MS Access dan Visual Basic.

Rekod boleh dibuat untuk semua murid di sekolah berkenaan mengikut kelas. Butir utama setiap murid disimpan. Jenis-jenis kesalahan disenaraikan dan pengguna hanya perlu memilih jenis kesalahan dalam list box yang disediakan.

Pemilihan jenis kesalahan akan memberi markah demi menunjukkan keseriusan kesalahan yang telah dilakukan. Sistem boleh menjana surat makluman kepada ibu-bapa murid yang berkenaan. Maklumat murid boleh dicetak pada bila-bila masa. Laporan disiplin yang kemaskini boleh dijanakan dengan mudah hanya dengan memilih butang-butang tertentu dalam sistem.

Sistem ini akan berbentuk "user-friendly" di mana guru-guru boleh memilih operasi menggunakan sistem butang. Sistem akan menggunakan "window interface".

# TABLE OF CONTENTS

ABSTRACT .....	ii
ABSTRAK .....	iii
DECLARATION .....	iv

## CHAPTER 1

## INTRODUCTION

1.1	Background of The Study .....	1
1.2	Problem Statement .....	5
1.3	Objectives of the study .....	6
1.4	Scope of The Study .....	7
1.5	Research Method .....	7
1.6	Defination of Terms .....	8
1.7	Limitation of The Study .....	10

## CHAPTER 2

## LITERATURE REVIEW

2.1	Introduction.....	12
2.2	Overview and Concept.....	12
2.3	Common School Discipline Issues .....	13
2.4	Research on Discipline Practices .....	14
2.5	Research Findings.....	16
2.6	Setting Up A School Discipline System.....	22
2.7	Components of A School Discipline System .....	22
2.8	Positive School Behaviour .....	23
2.9	An Effective School DIsipline System .....	23
2.10	Availability of A Ready Made Discipline System .....	24

5.3	Proposed System Testing .....	76
5.4	User Acceptance Testing.....	78
5.5	Proposed Conversion.....	80
5.6	Training.....	81
5.7	Changeover .....	82

**CHAPTER 6**

**CONCLUSION AND FUTURE WORKS**

6.1	Introduction.....	83
6.2	Summary .....	83
6.3	Future Works .....	85

	Bibliography .....	87
